

2020 COVID-19 SITUATION IN THE PHILIPPINES

AN INDEPTH LOOK THROUGH DATA

Disclaimer:
data only covers from January 1 - May 15 2020

METRO MANILA was the province with the most reported cases with **6873 cases**.

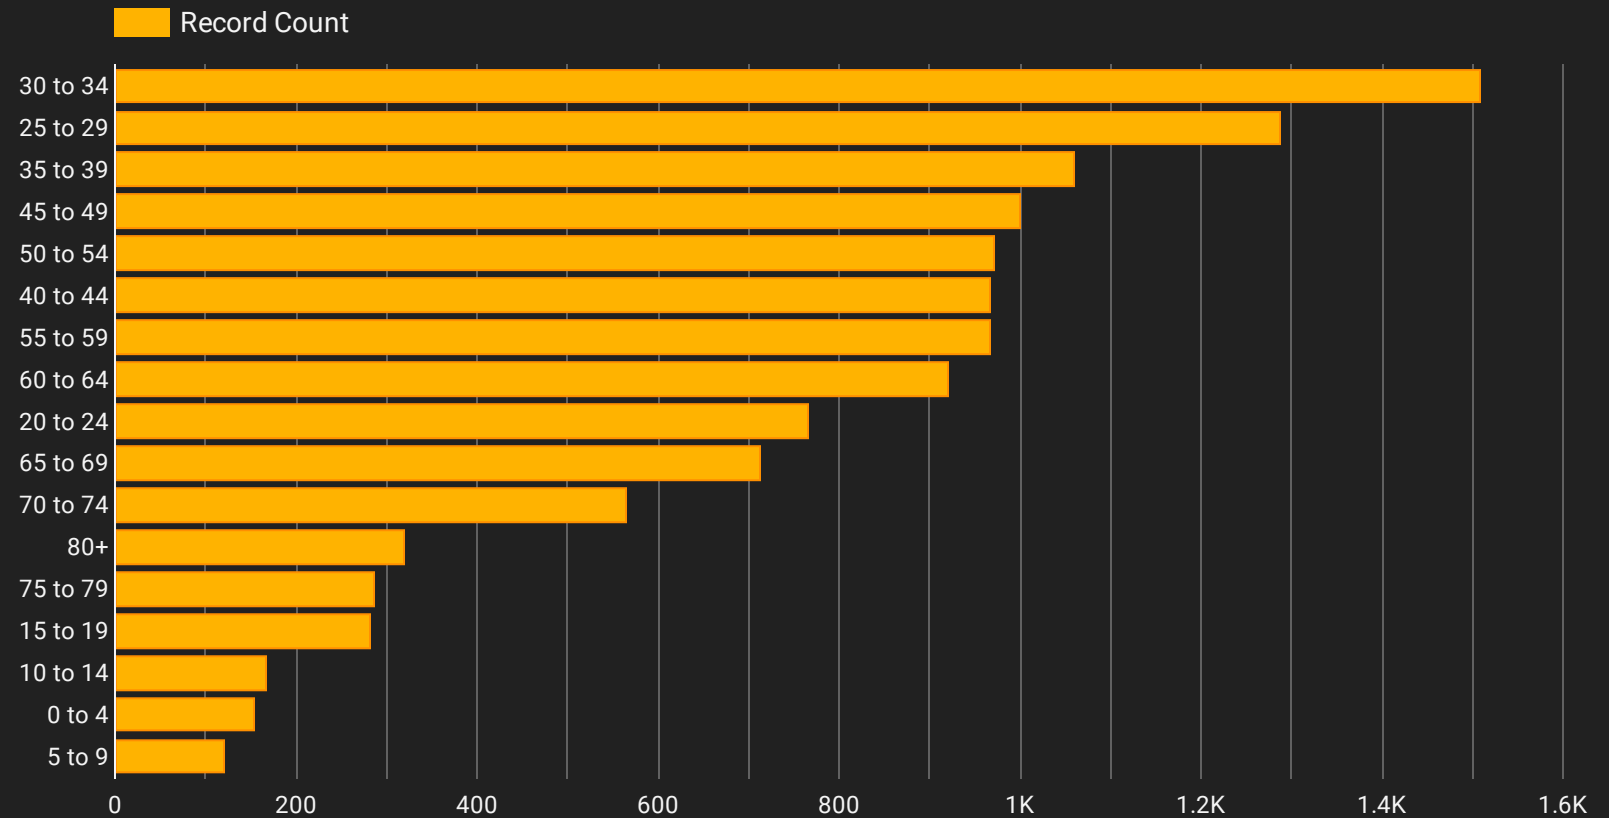

followed by:
Cebu with **1742 cases**
Unspecified Province with **1038 cases**
and **Rizal** with **417 cases**.

COVID infected a lot of early adults,

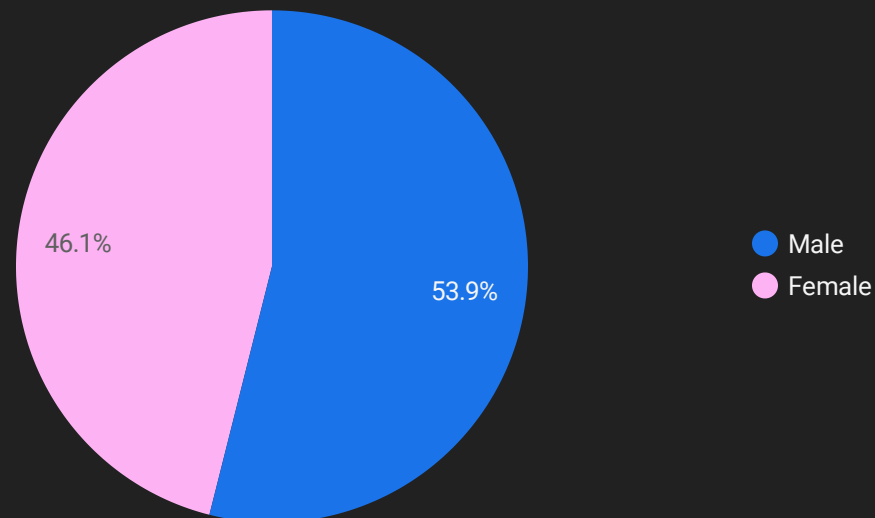

followed by the middle aged,

and those with old age and children.

53.9% of them are Male,

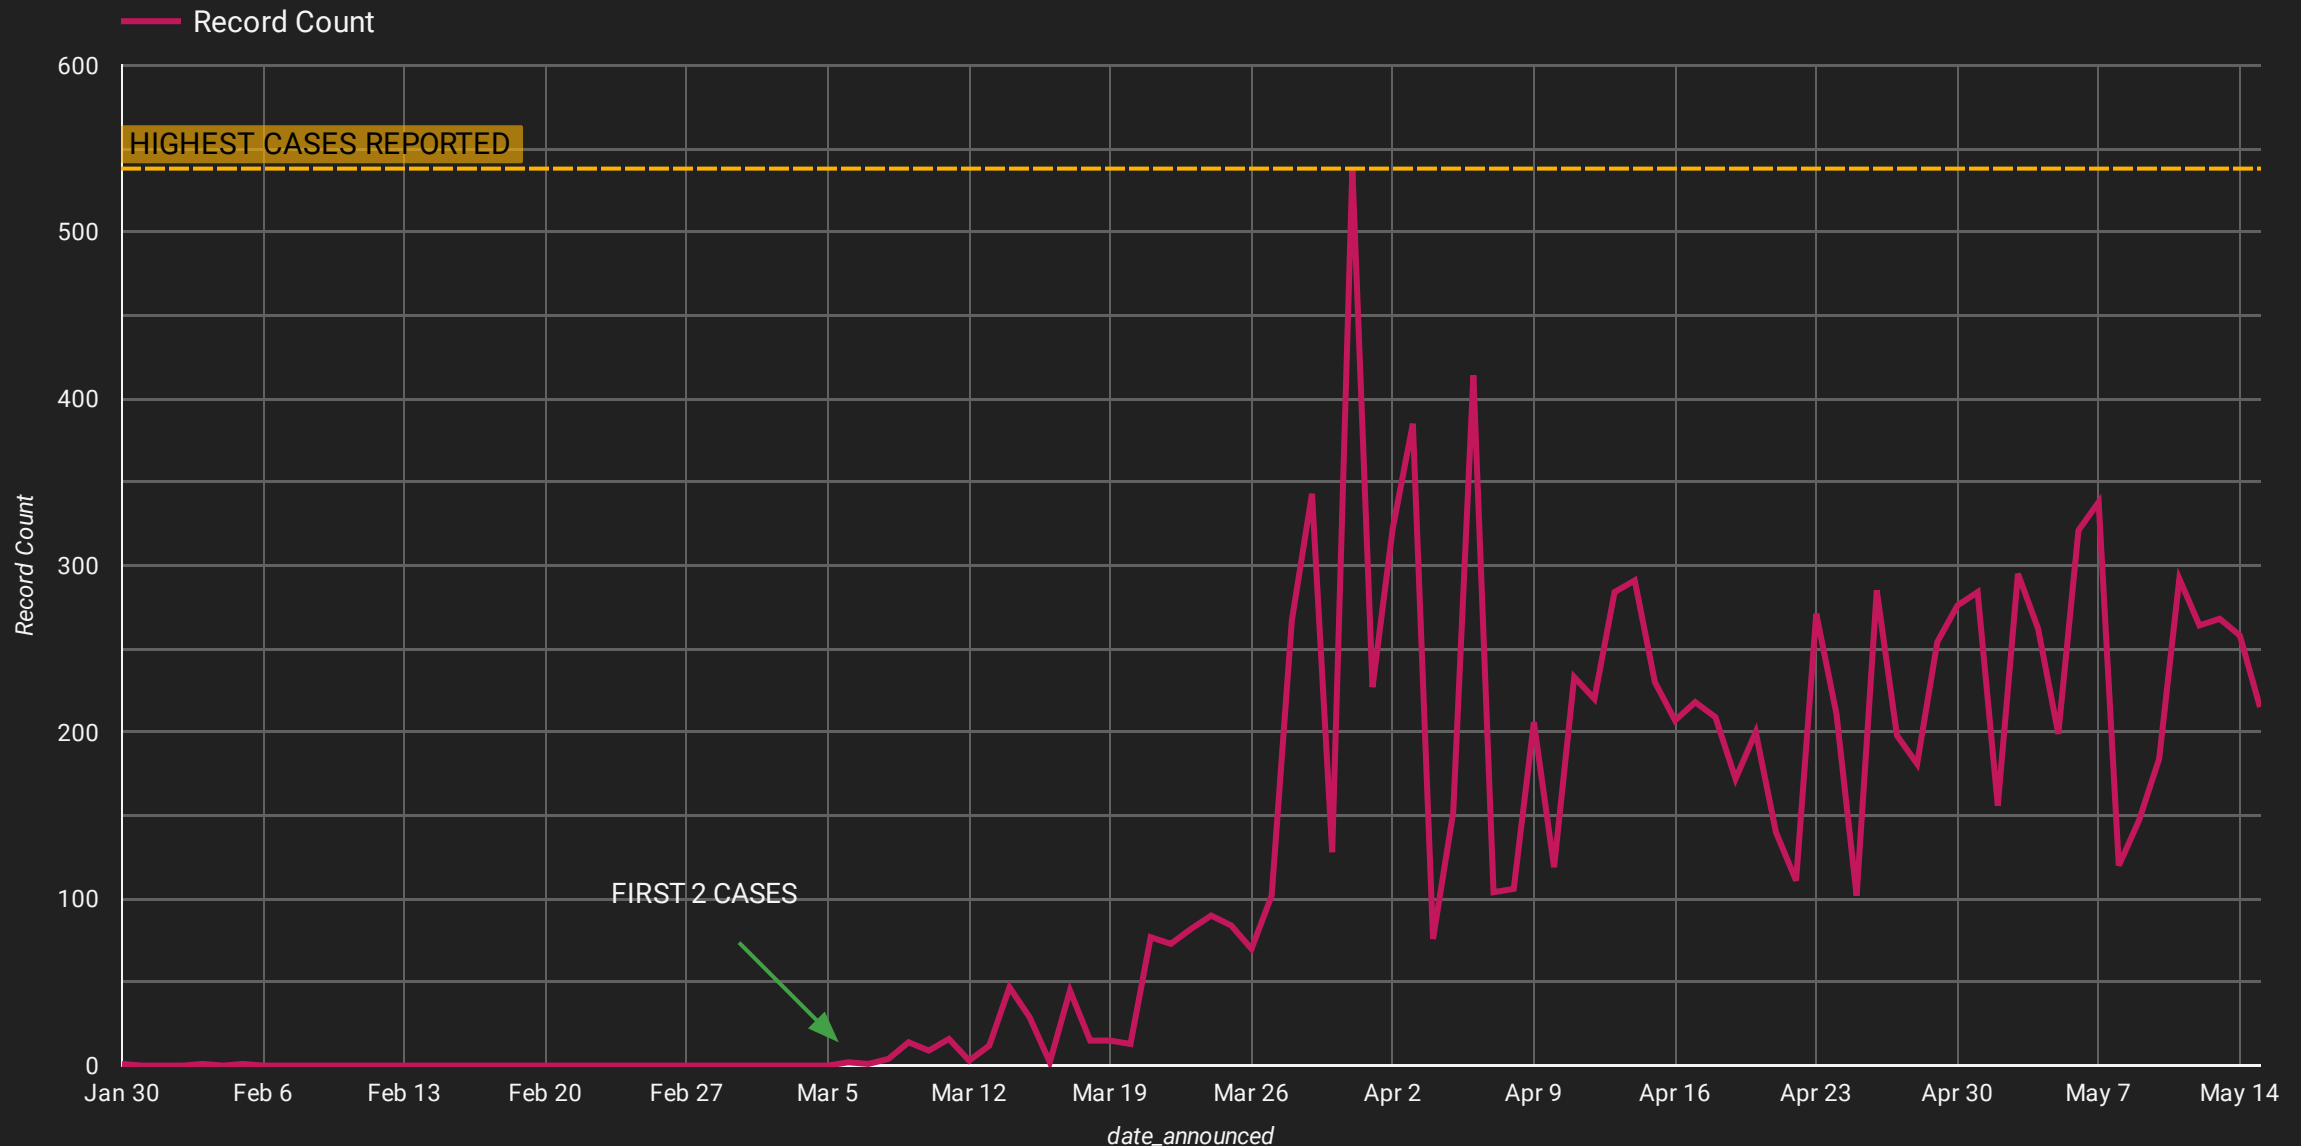

46.1% are Female.

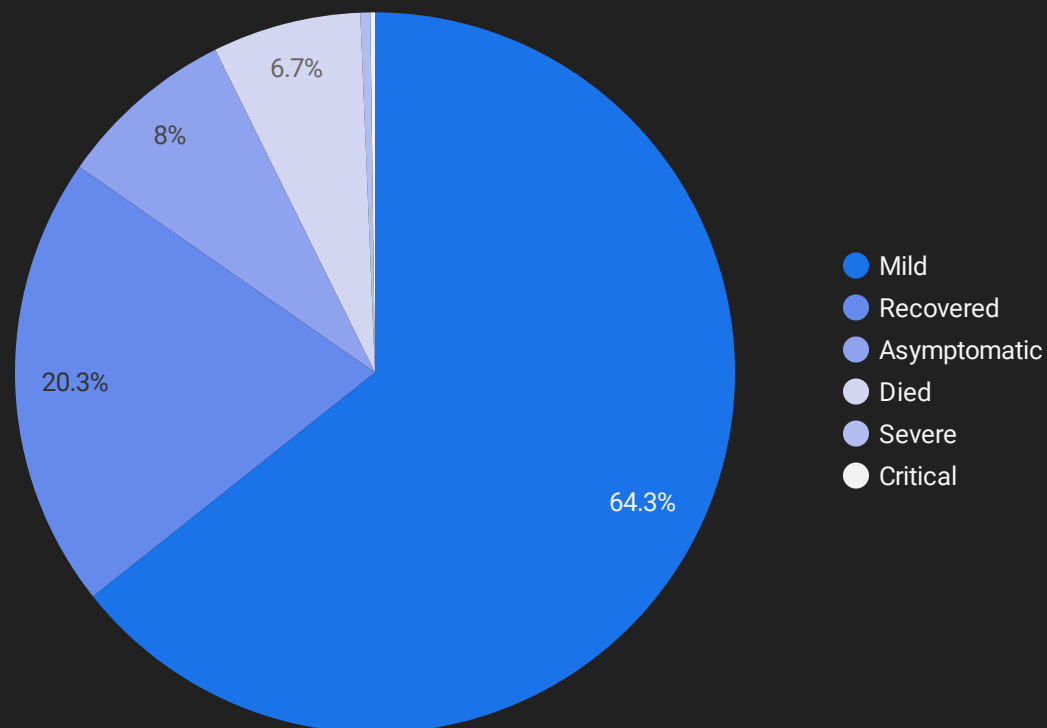

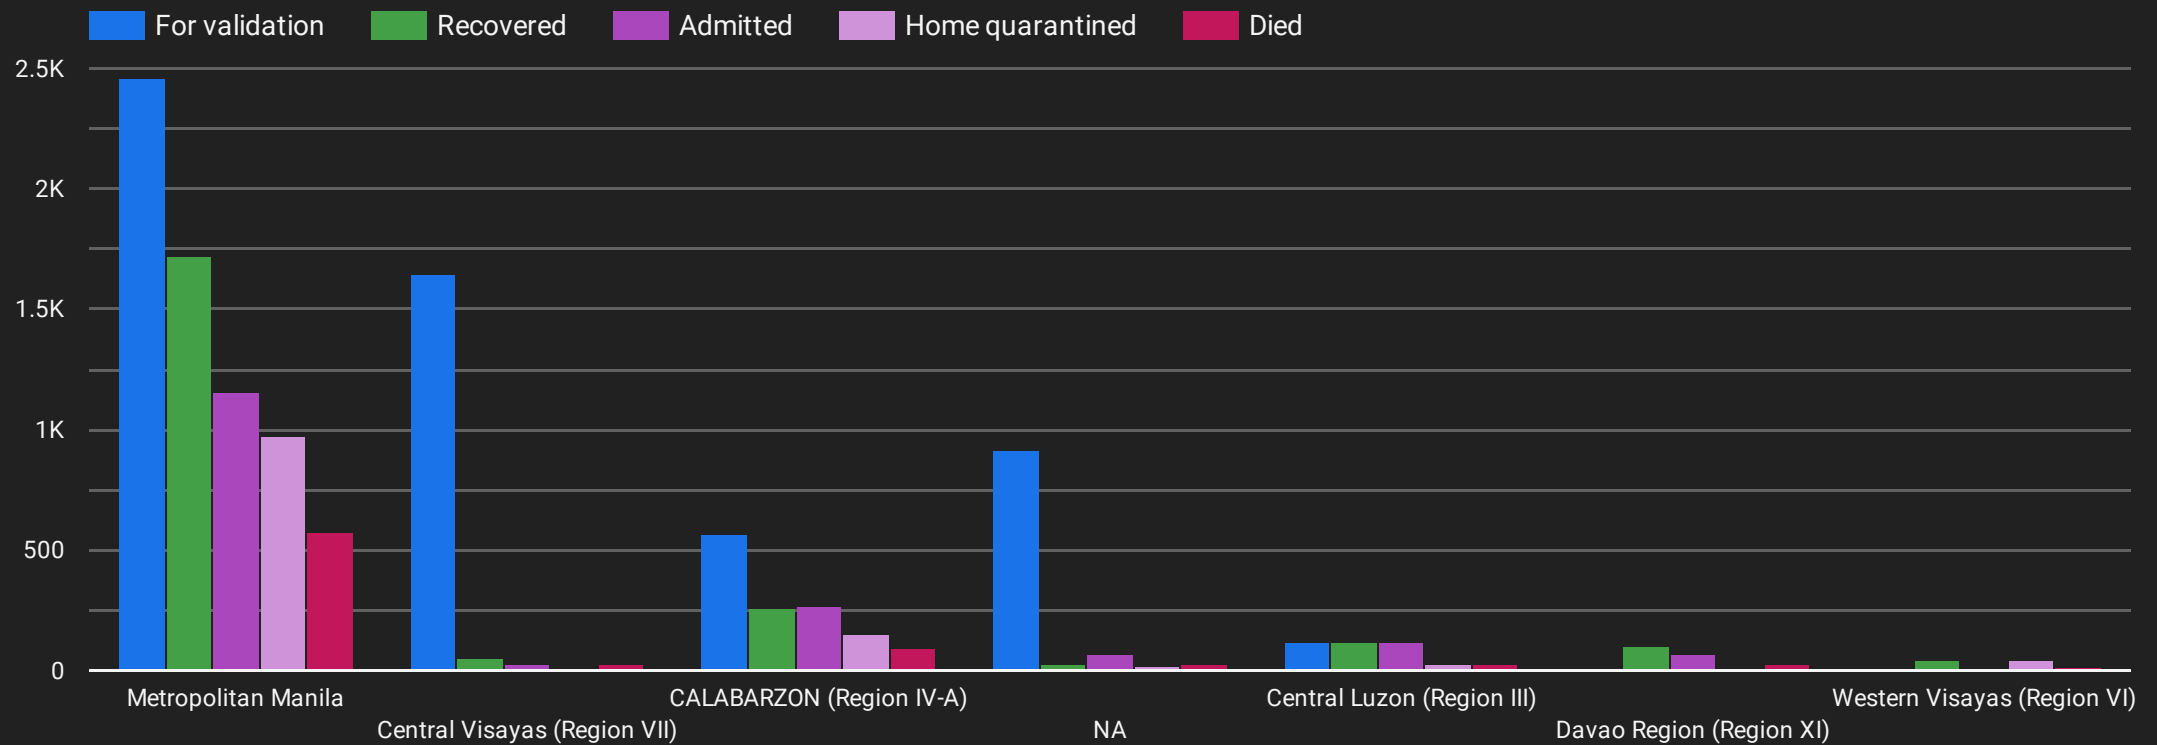

COVID does not have any specific targets, it can infect **anyone**, Male or Female no matter what how old, it can still infect them

The first reported cases
was on March 6.

The highest cases in
a day is on March 31
with 538 cases
reported.

As the data shows COVID really does infect a lot of people and even took the lives of a lot them.

But there are still a a noticeable amount of recoveries recorded.
